

AMENDMENTS TO THE SPECIFICATION:

Please amend paragraph 0068 as follows:

[0068] All the communication devices 10 in the ~~premises~~premises 100 are connected to one another through connections 30. Thus, according to the example in Fig 1, the communication device 10a is connected to the other communication devices 10b and 10c respectively through connections 30a and 30c. The connection 30a allows the transfer, from the communication device 10b to the communication device 10a, of the broadcasted signals reproduced by the loudspeakers 40c, 40d and previously weighted by a coefficient representing their respective couplings with the microphone 50a. The connection 30a also allows the transfer, from the communication device 10a to the communication device 10b, of the broadcasted signals reproduced by the loudspeakers 40a, 40b and previously weighted by a coefficient representing their respective couplings with the microphone 50b.
